## WORK EXPERIENCE

---

### Unvoid

Apr. 2024 - Today

*Software Engineer*

*Remote*

- International on-demand software development company.
- Key responsibilities:
  - Work with clients from the United States and communicate exclusively using the English language
  - Act on full-stack projects using Angular, React, NestJS, TypeScript, GoLang, MongoDB, and Elasticsearch.
- Key achievements:
  - Created and maintained a large web application from scratch along with my team
  - Delivered over 50 feature updates and enhancements across two client projects
  - Boosted team delivery capacity through process optimization, and effective collaboration strategies.

### Infominas / Azapfy

Feb. 2024 - Apr. 2024

*Full-Stack Developer*

*Remote*

- Sister companies focused on IT consulting and the development of delivery tracking software.
- Key responsibilities:
  - Develop features in the routing system using Python, Google Maps, and MapLink APIs
  - Create and modify modules in REST APIs using NestJS, TypeScript, and PHP Laravel.
- Key achievements:
  - Decreased the request time between the client and the router by ~20%
  - Improved the route creation system, with routes approximately 15% shorter and high precision.

## EDUCATION

---
