WORK EXPERIENCE

Unvoid   **Abr. 2024 - Today**
Junior Full-Stack Developer   *Remote*
- International on-demand software development company.
- Assigned roles:
  o Working with clients and team colleagues from other countries exclusively using the English language
  o Acting on full-stack projects with Angular, Express, NestJS, Mongo, TypeScript, and functional programming.
- Achieved results:
  o Launch of two platforms that are now accessed by users from various parts of the world.

Infominas / Azapfy   **Jan. 2024 - Today**
Full-Stack Developer   *Remote*
- Sister companies focused on IT consulting and the development of delivery tracking software.
- Assigned roles:
  o Developing features in the routing system using Python and Google Maps and MapLink APIs
  o Creating and modifying modules in REST APIs using NestJS, TypeScript, and PHP Laravel.
- Achieved results:
  o A decrease of ~20% in the request time between the client and the router
  o Improvement in the route creation system, with routes approximately 15% shorter and high precision.
